

Heavy Duty Battery Wash Station

WELDEX Battery and Charger Solutions
& Environmental Products

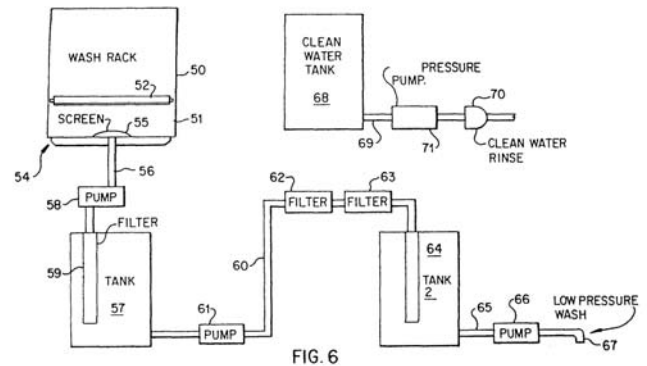

The PTPS143-HD connects to no drain or water supply. This is a totally self-contained closed loop system, except for electricity.

No installation just add water and plug in to start washing batteries.

This wash station uses low pressure to clean and rinse batteries (high pressure optional).

— SYSTEM FLOW CHART —

Benefits:

Less water consumption can use as little as one quart per battery. *Lower waste disposal cost if any. *No chance of polluting the environment. *Neutralizer additive is used to maintain a pH of 7-8.

Rugged all metal box construction.

Coated with special acid resistant coating.

The PTPS143-HD wash station system is patented process.
