UL Acid Absorbing & neutralizing Pillow

Weldex Sales Pillows are flame retardant and absorb & neutralize battery electrolyte.

Specifications:

UL Recognized Pillows:

NFPA 101 Class 1 fire rated

Neutralization - 7 plus ounces of sulfuric acid with a Specific Gravity of 1.21 to 1.26 per pound.

Absorption - 10 plus ounces of sulfuric acid per pound.

1/16 thick outer shell

Will indicate contact with acid by changing from bright yellow to red.

The 1/16 thick outer shell material is tear and puncture resistant. The safety yellow color makes the containment highly visible, as well giving early alert to acid spill by changing color. Pillows come in two sizes 12 by 12 inch (standard) & 6 by 24 inch (sock). The standard pillow weighs approximately 2.5 pounds of neutralizer/absorber the sock pillow contains approximately .75 to 1 pound of neutralizer. Sock pillow is designed to allow for separation into two 6 by 12 inch sections for those hard to fill areas.

BENEFITS:

UL Recognized Acid detection High visibility
Easy replacement and installation without breaking apart.
Long active life span, the neutralizer does not break down with age. Pillows should be replaced when acid detection is indicated by the color change component. Pillows can absorb moisture from the environment over time if this happens they should be replaced. Any pillow that has become hard or solid should be replaced.
